Simpaisa Network Playbook

Alternative Delivery Channels
for Frontier Markets

The playbook at a glance

Simpaisa connects digital businesses to the wallets, instant rails and cards of seven frontier markets through one integration — merchant acceptance, disbursements and remittance.

Who we are

Founded in 2016, headquartered in Singapore; PCI DSS Level 1 and ISO 27001 since 2022; 100+ merchants live across more than ten digital use cases, with 99% retention.

Where we run

Pakistan, Bangladesh, Nepal, Iraq, Egypt, Saudi Arabia and Nigeria — 880m people, young, mobile-first, and paying from wallets and bank accounts rather than cards.

What we connect

70 payment methods across domestic wallets, account-to-account and QR rails, domestic card schemes and international cards; all three flows in four markets, acceptance in all seven.

What we run today

275m+ transactions and USD 1bn+ a year for 30m+ customers, with real-time confirmation, multi-rail routing above 99.9% uptime and settlement in the merchant's currency.

Why it matters

In these markets a checkout that cannot offer the local method loses the sale. Wallets and instant rails carry the volume in five of the seven; local rails cost merchants a fraction of card acceptance.

Contents

How to read this playbook: the network first, then each market on one page, then how acceptance, payout and going live work across markets.

THE NETWORK

- 04 Overview**
Who Simpaisa is, what we enable, our country footprint and what we run today.
- 05 Our Relevant Use Cases**
Acceptance, disbursement and remittance use cases, with the methods each one uses.
- 06 Built for Scale. Engineered for Trust**
Collection and payout settlement flows, network resilience, support and compliance infrastructure.
- 07 The Gap We Close**
Wallet growth in Pakistan and Bangladesh and the payment primitives of all seven markets.
- 08 Market readiness at a glance**
The seven markets compared on wallet reach, instant rails, domestic cards and payout.

THE MARKETS

- 09 Pakistan**
Raast, wallets and PayPak; all three flows.
- 10 Bangladesh**
MFS wallets, Bangla QR and NPSB; all three flows.
- 11 Nepal**
Wallets, QR and connectIPS; all three flows.
- 12 Iraq**
Wallets and cards; acceptance.
- 13 Egypt**
Wallets, InstaPay and Meeza; acceptance and remittance.
- 14 Saudi Arabia**
mada, sarie and wallets; acceptance.
- 15 Nigeria**
NIP, wallets and Verve; all three flows.

WORKING TOGETHER

- 16 Acceptance across the network**
Where customers pay from, the checkout journeys and how a payment lands.
- 17 Remittance corridors**
Inbound flows into five receive markets and how a remittance lands.
- 18 Going live across the network**
From contract to first transaction, and what changes by market.
- 19 Let's connect — more markets**
Our office locations.

Overview

Founded in 2016 and headquartered in Singapore, Simpaisa is a technology company. We are the strategic monetisation partner to ride-hailing, gaming, media, digital commerce and marketplace businesses across MENA and South Asia, building the method connectivity, routing, reconciliation and settlement they rely on to get paid in every market they enter.

Our work covers merchant acceptance (C2B), disbursements (B2C) and remittance (C2C). A merchant integrates once, through a single API, and reaches the licensed banks, wallets, real-time payment systems and remittance partners of each market with routing, reconciliation and settlement structured for compliant fund flows and scheduled cross-border repatriation.

What we enable

Merchant acceptance

Merchants collect payments through domestic wallets, bank transfers and real-time rails, domestic and international cards, and over-the-counter payments. One integration covers every market we operate in, with routing and failover between methods.

Local and cross-border payouts

Real-time disbursements to wallets, bank accounts and over-the-counter points, plus remittance payouts for partner networks. Funds are prefunded through the licensed partner in each market and paid out locally; the merchant receives settlement and reconciliation information in one place.

Our products and country footprint

WHAT WE RUN TODAY

Payment infrastructure for the region's leading digital businesses

Global aggregators, gaming publishers, streaming platforms, marketplaces and ride-hailing networks run their collections and payouts on the Simpaisa network.

275m+

transactions a year

USD 1bn+

gross transaction value a year

30m+

unique customers served a year

Our Relevant Use Cases

Across these markets, customers often hold money in wallets or bank accounts rather than on cards. Simpaisa connects digital businesses to the payment and payout methods their customers use.

Acceptance Pay-in on the instruments customers actually use

Gaming

Real-time top-ups and in-game purchases, with payment confirmation at peak concurrent load.

Methods: wallets · carrier billing · OTC vouchers · cards

Marketplace

Prepaid marketplace checkout that converts cash-on-delivery orders to digital payments.

Methods: wallets · bank transfer and QR · cards · OTC

Streaming

Recurring subscriptions with wallet mandates, carrier billing, retries and customer opt-out.

Methods: wallet tokenisation · carrier billing · cards

Ride hailing

Frequent fare collection, reconciled alongside driver payouts in one file.

Methods: wallets · bank transfer · cards

Disbursements Real-time payout to wallets and bank accounts

E-commerce reseller settlement

Reseller settlement and refunds over local rails, without a local entity on the merchant side.

Methods: wallets · bank transfer

Gaming withdrawals

Screened and reconciled withdrawals and prize payouts to players' wallets and bank accounts.

Methods: wallets · bank transfer

Gig economy payouts

Wallet and bank payouts to freelancers, contractors and gig workers, reconciled in one place.

Methods: wallets · bank transfer

Remittance Last-mile payout for cross-border partners

Remittance partners

Wallet, bank and cash-out payouts for remittance partners, with instant settlement and FX pass-through.

Methods: wallets · bank transfer · OTC

Aggregator platforms

Local distribution of cross-border funds for aggregators through one connection to domestic payment rails.

Methods: wallets · bank transfer

OUR CLIENTELE

100+ merchants across more than 10 digital use cases, with 99% merchant retention.

Aggregators and networks	TerraPay, Thunes, dLocal, MoneyGram, Ria, Boku, Tazapay				
Gaming	Tencent Games, Garena (Free Fire), Codashop, Razer Gold, MTCGAME, Xsolla				
Entertainment	Spotify, tapmad, myco, GGDEN				
Commerce and mobility	TikTok, Temu, SHEIN, inDrive, Yango, Upwork, Shopify merchants

Built for Scale. Engineered for Trust.

Simpaisa's API-based network supports collections, settlement and payouts across every market we operate in, with routing and processing designed for reliable operation at volume.

Collection, settlement and payouts

We collect in local currency and settle merchants in their preferred currency. Licensed partners hold the funds at each stage. Simpaisa provides processing, routing, reconciliation and FX instruction, without taking possession, ownership or control of settlement funds.

Merchant acceptance and settlement

Local and international payouts

What the merchant gets

Centralised FX instruction

Predictable settlement structure

Managed liquidity

Multi-channel payout

One reconciliation file

Network resilience

-  Multi-rail architecture
-  Dynamic routing
-  Built-in redundancy
-  24/7 monitoring

Operational support

-  Dedicated account management
-  24/7 L1 support
-  SLA-backed operations
-  AI-assisted incident monitoring

Compliance infrastructure

	Regulatory alignment	Own or partner licence per market
	Structured onboarding	KYB, MATCH inquiry, MCC accuracy
	Secure processing	PCI DSS Level 1 (v4.0.1) · ISO/IEC 27001:2022 · certified since 2022
	Real-time reporting	Read-only dashboard access for the partner acquirer
	Settlement reporting	Settlement and reconciliation files in a consistent global reporting format.

The Gap We Close

Across these seven markets, customers pay from wallets and bank accounts as well as local cards. When these methods are missing at checkout, businesses risk losing the sale and the customer. Simpaisa connects these local methods through one integration.

Simpaisa network outreach

The growing wallet base in Pakistan and Bangladesh

Nigeria	42 per 100 OPay, PalmPay, Paga users	46 a year NIP 11.2bn transfers, 2024	Verve, AfriGO 100m Verve cards (Africa-wide)	NIP, wallets name enquiry on all accounts	A D R

Reach above 100 means people hold accounts with more than one provider. Rail scale is interbank or QR transfers per person a year where published; Iraq's inter-wallet rail is new and unranked.

How to read this map

Account reach
Registered wallets or transaction accounts per 100 people, from the figure on the market page; above 100 means multi-homing.

Domestic card scheme
The national scheme and the scale it publishes: cards in issue, issuing banks or e-commerce payments, as on the market page.

Instant rails
Transfers a year over the domestic instant or QR rail per person, from the latest published year or quarter annualised.

Payout rails and flows
Rails Simpaisa pays out on, with the validation available; A, D, R mark acceptance, disbursements and remittance offered.

READING THE MAP

Wallets and instant rails carry the volume in five of seven markets

Cards lead only in Saudi Arabia. Pakistan, Bangladesh, Nepal and Nigeria are wallet- or rail-first, Egypt is moving that way, and Iraq is still building its digital base. Simpaisa collects in all seven and pays out on the same wallets and rails in five.

5 of 7

How a payment lands

ACCEPTANCE NETWORK

Local methods at checkout in all seven markets

Wallets, instant rails and domestic cards on one API, with real-time confirmation, refunds to the original method and tokenised wallet payments where the wallets support them.

Remittance corridors

Five of the seven markets are major remittance receivers — USD 157bn inbound in the latest year between them — and the money increasingly lands in wallets and bank accounts rather than cash. Where it comes from, how much, the payout rule, and how Simpaisa lands it.

RECEIVE MARKET	INBOUND REMITTANCES	TOP SEND MARKETS (SHARES WHERE PUBLISHED)	PAYOUT RULE	SIMPAISA PAYOUT
 Pakistan	USD 41.6bn FY2026 · +8.6%	Saudi Arabia 24% · UAE 21% · UK 15% · EU 13%	Pakistan Remittance Initiative: free to sender and receiver, scheme credit within 24 hours; Simpaisa pays out in real time	Wallet or bank account; cash pick-up at agent points
 Bangladesh	USD 35.6bn FY2026 · +17.3%	Saudi Arabia 16% · UK 14% · UAE 13% · Malaysia 10% · USA 9%	2.5% government incentive on formal inflows; banks pay out about 95%, MFS about 5% and nearly doubled in 2025	Wallet or bank account
 Nepal	USD 16.2bn FY2025/26 · +28% in USD	Malaysia · Qatar · Saudi Arabia · UAE (by migrant destination; no official split)	Payout in NPR through NRB-licensed banks and remittance companies	Wallet or bank account
 Egypt	USD 41.5bn 2025 · +40.5%	Gulf states (Saudi Arabia · UAE · Kuwait) · USA · Europe (no official split)	Instant credit to bank accounts over InstaPay (the Instant Payment Network) since Dec 2024	Wallet or bank account, validated before credit
 Nigeria	USD 21.8bn 2025 · flat	USA · UK (diaspora; no official split)	Naira only, at the official rate (IMTO guidelines, Jan 2024)	Bank account over NIP, or wallet

How a remittance lands

RECEIVE-SIDE NETWORK

USD-prefunded, real-time payout in five receive markets

Simpaisa lands remittances for partners such as TerraPay, Thunes, dLocal, MoneyGram, Ria and Tazapay — wallet or bank-account credit in real time, account validation before credit, one reconciliation file across markets.

Going live across the network

A digital business adds Pakistan, Bangladesh, Nepal, Iraq, Egypt, Saudi Arabia and Nigeria through Simpaisa: local wallets, rails and domestic cards at checkout, withdrawals to the same wallets where the market allows, settlement in its own currency, one integration.

Five steps from contract to first transaction

What changes by market

MARKET	ACCEPTANCE	PAYOUT
 Pakistan	JazzCash, easypaisa, Alfa, HBL Konnect, Raast RTP, PayPak; in-app approval with or without OTP; tokenised recurring payments	Withdrawals to wallets or any IBAN over Raast and 1LINK IBFT; validated on all accounts and wallets
 Bangladesh	bKash, Nagad, Rocket, Upay, Bangla QR, TakaPay; wallet number, OTP, then PIN	Withdrawals to MFS wallets or bank accounts over NPSB and BEFTN; validated through integrated partners
 Nepal	eSewa, Khalti, IME Pay, connectIPS, NEPALPAY QR and Card; wallet login with MPIN or OTP	Withdrawals to wallets or bank accounts over connectIPS; validated on bank accounts
 Iraq	ZainCash, AsiaHawala, FastPay, NassPay and international cards; wallet number, PIN and OTP	Acceptance only; card and wallet payments settled locally through licensed providers
 Egypt	Vodafone Cash, e& Cash, Orange Cash, WE Pay, InstaPay, Meeza; wallet PIN and OTP; hosted card page	Acceptance and remittance; remittance payout to wallets or bank accounts, validated before credit
 Saudi Arabia	mada with 3-D Secure, sarie bank-app transfer, stc bank and urpay wallets; hosted page and in-app approval	Acceptance only; card and wallet payments settled locally
 Nigeria	OPay, PalmPay, Paga, NIP, NQR, Verve, AfriGO; transfer to a dynamic account; wallet PIN or OTP	Withdrawals to bank accounts over NIP, or to wallets; name enquiry on all accounts

What the merchant integrates

- Acceptance: one API, hosted or in-app checkout, tokenised wallet payments for recurring top-ups, refunds to the original method
- Payout: one payout call to a wallet or bank account, with account validation before credit
- Real-time confirmation by webhook at peak concurrent load, both ways

What Simpaisa runs

- Licensed acceptance and payout through its own or partner licences in each market
- Multi-rail routing with failover, above 99.9% uptime
- Prefunded payout balances and settlement in the merchant's currency
- Settlement and reconciliation files in a consistent global format, dedicated account management, 24/7 L1 support

WHAT IT DELIVERS

Collect and pay out for 880m people, on one integration

Wallet, account and domestic-card payers who never reach an international card checkout become customers; withdrawals land on the same wallets in real time where the market allows.
