Simpaisa Network Playbook

Alternative Delivery Channels
for Frontier Markets

Overview

Founded in 2016 and headquartered in Singapore, Simpaisa is a technology company. We are the strategic monetisation partner to ride-hailing, gaming, media, digital commerce and marketplace businesses across MENA and South Asia, building the method connectivity, routing, reconciliation and settlement they rely on to get paid in every market they enter.

Our work covers merchant acceptance (C2B), disbursements (B2C) and remittance (C2C). A merchant integrates once, through a single API, and reaches the licensed banks, wallets, real-time payment systems and remittance partners of each market with routing, reconciliation and settlement structured for compliant fund flows and scheduled cross-border repatriation.

Simpaisa has held PCI DSS Level 1 and ISO 27001 certification since 2022 and was named Fastest Growing Fintech Company, Pakistan at the Global Banking & Finance Awards 2025.

What we enable

Merchant acceptance

Merchants collect payments through domestic wallets, bank transfers and real-time rails, domestic and international cards, and over-the-counter payments. One integration covers every market we operate in, with routing and failover between methods.

Local and cross-border payouts

Real-time disbursements to wallets, bank accounts and over-the-counter points, plus remittance payouts for partner networks. Funds are prefunded through the licensed partner in each market and paid out locally; the merchant receives settlement and reconciliation information in one place.

WHAT WE RUN TODAY

Payment infrastructure for the region’s leading digital businesses

Global aggregators, gaming publishers, streaming platforms, marketplaces and ride-hailing networks run their collections and payouts on the Simpaisa network.

275m+

transactions a year

USD 1bn+

gross transaction value a year

30m+

unique customers served a year

Our Relevant Use Cases

Across these markets, customers often hold money in wallets or bank accounts rather than on cards. Simpaisa connects digital businesses to the payment and payout methods their customers use.

Acceptance Pay-in on the instruments customers actually use

Gaming

Real-time top-ups and in-game purchases, with payment confirmation at peak concurrent load.

Methods: wallets · carrier billing · OTC vouchers · cards

Marketplace

Prepaid marketplace checkout that converts cash-on-delivery orders to digital payments.

Methods: wallets · bank transfer and QR · cards · OTC

Streaming

Recurring subscriptions with wallet mandates, carrier billing, retries and customer opt-out.

Methods: wallet tokenisation · carrier billing · cards

Ride hailing

Frequent fare collection, reconciled alongside driver payouts in one file.

Methods: wallets · bank transfer · cards

Disbursements Real-time payout to wallets and bank accounts

E-commerce reseller settlement

Reseller settlement and refunds over local rails, without a local entity on the merchant side.

Methods: wallets · bank transfer

Gaming withdrawals

Screened and reconciled withdrawals and prize payouts to players' wallets and bank accounts.

Methods: wallets · bank transfer

Gig economy payouts

Wallet and bank payouts to freelancers, contractors and gig workers, reconciled in one place.

Methods: wallets · bank transfer

Remittance Last-mile payout for cross-border partners

Remittance partners

Wallet, bank and cash-out payouts for remittance partners, with instant settlement and FX pass-through.

Methods: wallets · bank transfer · OTC

Aggregator platforms

Local distribution of cross-border funds for aggregators through one connection to domestic payment rails.

Methods: wallets · bank transfer

Built for Scale. Engineered for Trust.

Simpaisa's API-based network supports collections, settlement and payouts across every market we operate in, with routing and processing designed for reliable operation at volume.

Collection, settlement and payouts

We collect in local currency and settle merchants in their preferred currency. Licensed partners hold the funds at each stage. Simpaisa provides processing, routing, reconciliation and FX instruction, without taking possession, ownership or control of settlement funds.

Merchant acceptance and settlement

Local and international payouts

What the merchant gets

Centralised FX instruction

Predictable settlement structure

Managed liquidity

Multi-channel payout

One reconciliation file

Network resilience

- Multi-rail architecture
- Dynamic routing
- Built-in redundancy
- 24/7 monitoring

Operational support

- Dedicated account management
- 24/7 L1 support
- SLA-backed operations
- AI-assisted incident monitoring

Compliance infrastructure

Regulatory alignment	Own or partner licence per market
Structured onboarding	KYB, MATCH inquiry, MCC accuracy
Secure processing	PCI DSS Level 1 (v4.0.1) · ISO/IEC 27001:2022 · certified since 2022
Real-time reporting	Read-only dashboard access for the partner acquirer
Settlement reporting	Settlement and reconciliation files in a consistent global reporting format.

The Gap We Close

In these markets, people pay online using wallets or bank accounts. A gateway that cannot offer the local payment method loses the transaction.

Domestic scale and card–rail context

MARKET	DOMESTIC RAIL CARRYING THE VOLUME	CARD RAIL · NEAREST PERIOD
 Pakistan	Raast: PKR 23.3tn (≈ USD 83bn) 742.1m transactions, Q3 FY26. P2M QR subsidy: PKR 3.5bn (≈ USD 12.5m), Sep 2025–Jun 2026.	PayPak: >25% of 53m debit cards, but ~6% of card usage (Dec 2025). Card usage remains concentrated in cash withdrawals.
 Bangladesh	MFS: BDT 1.72tn (≈ USD 14bn) Jan 2025; 239.3m accounts including merchants. Bangla QR mandatory from 1 Jul 2026.	Domestic credit–card value, Mar 2025: Visa 71.8% · Mastercard 17.5%. Non–digital share of reported payment value: 67.2% (2025).
 Nepal	QR: NPR 958bn (≈ USD 7bn) NRB FY2024/25 report, up from NPR 500bn (≈ USD 3.7bn). 26.8m wallets; +201% over four years.	Card e–commerce: NPR 13.5bn (≈ USD 100m), FY2024/25 report. 318,428 credit cards at mid–Jul 2025.
 Iraq	Inter–wallet merchant payments CBI launched transfers across wallet providers, including merchant–wallet purchases, on 3 Sep 2025.	A comparable local–card volume series remains under source review.
 Egypt	Wallets: EGP 4tn (≈ USD 80bn) 2025; 60m registered wallets. InstaPay/IPN: >16m users, >1.1bn transactions, EGP 2.4tn (≈ USD 48bn), by Jun 2025.	>43.5m Meeza cards by Jun 2025. A card–not–present share is not provided in the cited CBE release.
 Saudi Arabia	14.6bn electronic transactions, 2025 National payment systems; electronic retail share shown above. mada covers domestic POS, ATM and e–commerce channels.	Already served Mastercard Gateway: SAMA–certified with local processing and direct mada integration, announced late 2025.
 Nigeria	NIP: 11.2bn transactions, 2024 Domestic acquiring, switching and settlement requirements apply by payment channel.	Already served Mono A2A through Mastercard Gateway, announced 2 Apr 2024.

Scope of the proposal

The proposal covers high–volume local payment methods for acceptance, disbursements and remittance, complementing existing gateway coverage through acquirers in several markets. It does not include acquiring or request exclusivity or category rights in any market.

Pakistan
