Simpaisa Network Playbook

Local Payment Networks Across Emerging Markets

The playbook at a glance

Simpaisa builds and operates a country-level network of wallets, banks, switches, domestic schemes and licensed partners. We choose the right access architecture by market, manage routing and redundancy across those rails, govern settlement and reconciliation, and continuously optimise the network for coverage, cost and quality.

Who we are

Founded in 2016 and headquartered in Singapore. PCI DSS Level 1 and ISO 27001 certified; 100+ merchants across more than ten use cases.

Where we run

Pakistan, Bangladesh, Nepal, Iraq, Egypt, Saudi Arabia and Nigeria. Together, these markets have a population of about 880m.

What we connect

Wallets, bank transfers and cards. Acceptance in seven markets, disbursements in six and remittance payout in five.

What we run today

Across supported payment methods, Simpaisa processes 275m+ transactions and USD 1bn+ annually. It serves 30m+ unique merchant end users.

Why it matters

When local wallets or bank transfers are missing at checkout, businesses risk losing the sale and the customer.

Contents

How to read this playbook: the network first, then each market on one page, then how acceptance, payout and going live work across markets.

THE NETWORK

- 04 Simpaisa and our network**
Who Simpaisa is, what we enable, our country footprint and what we run today.
- 05 How businesses use Simpaisa**
Acceptance, disbursement and remittance use cases, with the methods each one uses.
- 06 How payments move through Simpaisa**
Collection and payout settlement flows, network resilience, support and compliance infrastructure.
- 07 The Gap We Close**
Wallet growth and local payment indicators across seven markets.
- 08 Payment landscape and Simpaisa coverage**
Market indicators and Simpaisa acceptance, disbursement and remittance coverage.

THE MARKETS

- 09 Pakistan**
Raast, wallets and PayPak; all three flows.
- 10 Bangladesh**
MFS wallets, Bangla QR and NPSB; all three flows.
- 11 Nepal**
Wallets, QR and connectIPS; all three flows.
- 12 Iraq**
Wallets and cards; acceptance.
- 13 Egypt**
Wallets, InstaPay and Meeza; all three flows.
- 14 Saudi Arabia**
mada, sarie and wallets; acceptance and disbursements.
- 15 Nigeria**
NIP, wallets and Verve; all three flows.

WORKING TOGETHER

- 16 Acceptance across the network**
Where customers pay from, the checkout journeys and how a payment lands.
- 17 Remittance receive markets**
Reported inflows into five receive markets and how local payout works.
- 18 Connecting a merchant to the network**
From contract to first transaction, and what changes by market.
- 19 Let's connect more markets.**
Our office locations.

Simpaisa and our network

Founded in 2016 and headquartered in Singapore, Simpaisa connects digital businesses to local payment methods. We support gaming, streaming, marketplaces and mobility businesses across the Middle East, South Asia and Africa.

Our network supports merchant acceptance (C2B), disbursements (B2C) and remittance (C2C). We design and manage the local network for you, and you access that entire network through one API. Licensed partners handle funds; Simpaisa provides payment processing, routing and reconciliation.

What we enable

Merchant acceptance

Collect through local wallets, bank transfers, cards and supported cash-payment points. Methods are enabled by market through one integration, with routing and failover.

Local and cross-border payouts

Send disbursements and remittance payouts to supported wallets and bank accounts. Settlement and payout structures are implemented through licensed banking and payment partners according to the regulatory and network model in each market. Destination, timing and settlement terms depend on the market and method.

WHAT WE RUN TODAY

Collections and payouts for digital businesses

Combined processing across supported payment methods, serving merchant end users across payments, gaming, commerce and mobility.

275m+

transactions processed annually

USD 1bn+

annual payment value processed

30m+

unique merchant end users served

How businesses use Simpaisa

Customers pay through wallets, bank accounts and cards. Simpaisa connects businesses to those methods for purchases, disbursements and remittance payout.

Acceptance Payment options for everyday purchases

**Gaming**

Top-ups and in-game purchases, with payment confirmation.

Methods: wallets · carrier billing · OTC vouchers · cards

**Marketplace**

Digital payment at marketplace checkout, including prepaid orders.

Methods: wallets · bank transfer and QR · cards · OTC

**Streaming**

Subscriptions with supported recurring methods, retries and opt-out.

Methods: wallet tokenisation · carrier billing · cards

**Ride hailing**

Fare collection and driver payouts, reconciled in one file.

Methods: wallets · bank transfer · cards

Disbursements Real-time payout to wallets and bank accounts

**E-commerce reseller settlement**

Reseller settlements and refunds through supported local wallets and bank accounts.

Methods: wallets · bank transfer

**Gaming withdrawals**

Screened withdrawals and prize payouts to player wallets and bank accounts.

Methods: wallets · bank transfer

**Gig economy payouts**

Payouts to freelancers, contractors and gig workers, with reconciliation.

Methods: wallets · bank transfer

Remittance Last-mile payout for cross-border partners

**Remittance partners**

Remittance payout to wallets, banks and cash points, with agreed funding and FX.

Methods: wallets · bank transfer · OTC

**Aggregator platforms**

Local payout for aggregators through one connection to domestic methods.

Methods: wallets · bank transfer

How payments move through Simpaisa

Simpaisa processes payment instructions, routes transactions and provides reconciliation. Licensed partners hold settlement funds and make local payouts.

Collection, settlement and payouts

Funds are held and moved through the relevant licensed banking or payment partner. Simpaisa provides the processing, routing, reconciliation and settlement instructions required by the operating model.

The Gap We Close

Across these seven markets, customers pay from wallets and bank accounts as well as local cards. When these methods are missing at checkout, businesses risk losing the sale and the customer. Simpaisa connects these local methods through one integration.

Add local payment acceptance across seven markets, with disbursements in six and remittance payout in five. Configure methods, test the payment journeys and agree settlement terms before launch.

Five steps from contract to first transaction

Market-specific setup

MARKET	ACCEPTANCE	PAYOUT
 Pakistan	Enable selected wallets, Raast and cards. Confirm recurring-payment support.	Disbursements and remittance: wallets or bank accounts over Raast / IBFT.
 Bangladesh	Enable selected MFS wallets, bank transfers and cards. Test wallet authentication.	Disbursements and remittance: MFS or bank accounts over NPSB / BEFTN.
 Nepal	Enable wallets, connectIPS and cards. Test MPIN, OTP and QR journeys.	Disbursements and remittance: wallets and connectIPS bank accounts.
 Iraq	Enable supported wallets and cards. Test redirect, PIN and OTP.	No disbursements or remittance. Acceptance settlement through local partners.
 Egypt	Enable wallets, InstaPay, cards and Fawry collections. Test method authentication.	Disbursements and remittance: wallets and bank accounts.
 Saudi Arabia	Enable selected wallets, sarie and mada. Test bank-app and 3-D Secure journeys.	Disbursements to wallets and bank accounts. No remittance payout.
 Nigeria	Enable wallets, NIP and cards. Test dynamic accounts and recipient checks.	Disbursements and remittance: bank accounts over NIP, or supported wallets.

What the merchant integrates

- One API for checkout, supported recurring payments and refunds to the original method.
- Wallet and bank payouts, with account validation before credit.
- Real-time payment confirmation by webhook for acceptance and payout.

What Simpaisa runs

- Acceptance and payout under Simpaisa or partner licences, by market.
- Multi-rail routing with failover.
- Prefunded payout balances; settlement in the agreed merchant currency.
- Reconciliation files, dedicated account management and 24/7 L1 support.

WHAT IT DELIVERS

Local acceptance, with payouts where supported

Connect local checkout and supported payouts through one API, with settlement in the agreed merchant currency and one reconciliation file.
